1. When ordering, please specify **termination** and **packaging** codes:

**DA2303-ALD**

**Termination:** L = RoHS compliant tin-silver over tin over nickel over phos bronze.

**Special order:**

T = RoHS tin-silver-copper (95.5/4/0.5) or

S = non-RoHS tin-lead (63/37).

**Packaging:** D = 13" machine ready reel. EIA-481 embossed plastic tape (600 per full reel). Quantities less than full reel available: in tape (not machine ready) or with leader and trailer (\$25 charge).

B = Less than full reel. In an effort to simplify our part numbering system, Coilcraft is eliminating the need for multiple packaging codes. When ordering, simply change the last letter of your part number from B to D

- Inductance is tested between pins 4 and 3 at 500 kHz, 0.5 Vrms, 0 A dc.
  - DCR is per winding.
  - Leakage inductance is for the primary with both windings connected in series and with the secondary windings shorted.
  - Volt-time product is for the primary, between pins 4 and 1 with pins 2 and 3 connected.
  - Calculated output power based on 150 kHz operating frequency. Power varies depending on application.
  - Electrical specifications at 25°C.
- Refer to Doc 362 "Soldering Surface Mount Components" before soldering.
